

SKF Bearing Grease

# High load, high temperature, high viscosity bearing grease

## LGHB 2

SKF LGHB 2 is a high viscosity, mineral oil based grease, using calcium sulphonate complex thickener. Formulated to withstand high temperatures and extreme loads, it is suitable for a wide range of applications, especially in the cement, mining and metals segments. It also has very good pumpability properties.

- Excellent load capacity, anti-oxidation and corrosion protection even with large water ingress
- Withstands peak temperatures of 200 °C (390 °F)

### Typical applications

- Steel on steel plain bearings
- Pulp and paper making machines
- Asphalt vibrating screens
- Continuous casting machines
- Sealed spherical roller bearings operating up to 150 °C (300 °F)
- Work roll bearings in steel industry
- Mast rollers of fork lift trucks
- Slewing bearings

### Available pack sizes

Packsize	Designation	Packsize	Designation
420 ml cartridge	LGHB 2/0.4	Electro-mechanical lubricators	
5 kg can	LGHB 2/5	TLSD series 125 ml	TLSD 125/HB2
18 kg pail	LGHB 2/18	TLSD series 125 ml refill	LGHB 2/SD125
50 kg drum	LGHB 2/50	TLSD series 250 ml	TLSD 250/HB2
180 kg drum	LGHB 2/180	TLSD series 250 ml refill	LGHB 2/SD250

## LubeSelect for SKF greases

Selecting a suitable grease for a particular bearing is a crucial step if the bearing is to meet design expectations in its application. SKF knowledge about bearing lubrication has been encapsulated into a computer program that can be consulted at [skf.com/lubeselect](http://skf.com/lubeselect)

LubeSelect for SKF greases provides you a user friendly tool to select the right grease and suggest frequency and quantity, while taking into account the particular conditions of your application. General guidelines for typical greases for different applications are also available.
